What is Certified Information Systems Security Professional (CISSP)

The CISSP training is a comprehensive course that provides an in-depth understanding of cyber security. It equips you with the necessary skills to tackle threats and protect interests. The course covers the 8 domains of the CISSP Common Body of Knowledge (CBK), providing a broad base of knowledge applicable in daily practice. Please note, the exam is not included in this training.

Who should attend Certified Information Systems Security Professional (CISSP)

- IT Managers: Gain a comprehensive understanding of cyber security to make informed decisions.
- Network Engineers: Learn about network security to better protect your organization's network.
- Security Consultants: Enhance your consulting skills with a broad knowledge of cyber security.
- Software Developers: Understand software security to develop more secure applications.
- Risk Analysts: Learn about security and risk management to better analyse and mitigate risks.

Prerequisites

A basic understanding of information technology and a keen interest in cyber security is required.

Objectives

At the end of the training, you will be able to:

- Understand the 8 domains within the CBK.

- Lay a solid foundation to do the CISSP exam (not included) after self-study.
- Apply the theory in daily practice.
