What is Information Security Management Professional (ISMAS)

In today's world, security issues are at the forefront of media attention. Privacy-sensitive data is no longer safe and is shared globally. Leaks in security software provide hackers with plenty of opportunities, and social media is used for information gathering. The ISMAS training, a sequel to the ISFS training and based on ISO/IEC27002, addresses these concerns. It contributes to the management aspects that need to be seen regularly in the Security field from the perspective of Business, Customer, and Supplier. It provides this content by examining risk management aspects and assurance through Controls. The training is especially suitable for anyone who needs to understand the governance aspects of security and knowing how to demonstrate compliance adequately against the applicable laws and regulations.

Who should attend Information Security Management Professional (ISMAS)

- IT Managers: Gain insights into managing security aspects within your team.
- Compliance Officers: Understand how to demonstrate compliance adequately.
- Risk Managers: Learn about risk management aspects in the security field.
- Business Analysts: Understand the security aspects from a business perspective.
- IT Consultants: Equip yourself with the knowledge to advise on security management.

Prerequisites

A basic understanding of IT and security concepts is required. Prior completion of the ISFS training is recommended but not mandatory.

Objectives

At the end of the training you will be able to:

- Gain deeper knowledge of management aspects within the Security field.
- Cover all subjects that belong to the EXIN certificate Information Security Management Professional (ISMP).
- Gain knowledge and insight that has a solid place in the market and offers concrete tools for setting up an organization in accordance with applicable laws and regulations.
