What is Introduction Data Management based on DMBOK

Many organisations understand the importance of being a data driven organisation and to make business decisions that are supported by data. Having data that is of high quality and managed well is a prerequisite for that. In this training we will cover all aspects of Data Management to make sure that you have a solid foundation for using data in business decisions as described in the industry standard for data management: DAMA DMBOK. Examples of DMBOK knowledge areas are Data Governance, Data Quality and Data Security. The training introduces Data & Data Management and gives you a good basis for gaining more in-depth knowledge.

Who should attend Introduction Data Management based on DMBOK

- Data Managers: Individuals responsible for overseeing data management processes and ensuring data quality.
- Data Analysts: Professionals who analyze data to help organizations make informed decisions.
- IT Professionals: Those working in IT who need to understand data management principles to support their roles.
- Business Analysts: Professionals who analyze business processes and need to understand the role of data in these processes.
- Project Managers: Individuals managing projects that involve data and need to ensure data is handled correctly.
- Data Governance Officers: Professionals responsible for ensuring data policies and procedures are followed.
- Database Administrators: Those who manage and maintain databases and need to understand data management best practices.

- Compliance Officers: Individuals ensuring that data management practices comply with relevant laws and regulations.
- Data Scientists: Professionals who need to understand data management to effectively analyze and interpret data.
- Executives: Leaders who need to understand the strategic importance of data management for their organizations.

Prerequisites

Basic understanding of data concepts and familiarity with business processes. No prior data management experience is required, but a willingness to learn and engage with the material is essential.

Objectives

At the end of this training you will be able to:

- Understand the importance of data management in making decisions that are supported by data.
- Understand what the DMBOK knowledge areas are and how they help in building in proper data foundation. In addition, you can explain the relationship between these various knowledge areas.
- Recognize data management pitfalls within organizations and various solution areas to address this.
