Dayparts	5
Price	€1.600,00 excl. VAT No extra costs.

What is Leading SAFe® (SA)

The Scaled Agile Framework, or SAFe, is the leading framework for Business Agility. The Leading SAFe (SA) course provides a comprehensive overview of the principles and best practices of SAFe. Topics include agile teams and agile release trains, feature creation and prioritization, DevOps in SAFe, and architecture. The course also includes a live simulation of a PI Planning event. We also cover Lean Portfolio Management, change management, and SAFe implementation. This course is a solid foundation for more advanced SAFe courses.

This course is the official SAFe course and is delivered by certified trainers. The SAFe Agilist (SA) certification exam is included in the course. The cost of the exam is part of the course price. You will take this online exam at a time and place of your own choice, but within 30 days of the course. In the Scaled Agile online learning environment, you will have access to an e-learning prior to attending the course and to the digital workbook that accompanies the course. You can also use this environment to take a practice test (mock exam). If this is your first SAFe training, a one-year membership to SAFe Studio is included. Through SAFe Studio, you have access to all articles of the SAFe-framework, SAFe Copilot, e-larnings, videos, discussion forums, toolkits and templates. We always use the latest training materials from Scaled Agile.

Who should attend Leading SAFe® (SA)

- Agile Coaches: Learn how to guide your teams in applying the SAFe principles.
- Software Developers: Gain insights into how SAFe can improve your development practices.
- Product Owners: Learn how to prioritize features within the SAFe framework.
- Business Analysts: Understand how to analyze and implement business requirements in a SAFe environment.

Prerequisites

Participants should have a basic understanding of Agile principles and methodologies.

Objectives

At the end of the training, you will be able to:

- Establish Team and Technical Agility and organize around the flow of value.
- Align massive organizations around clear, common objectives.
- Participate successfully in critical SAFe events, such as PI Planning.
- Adopt a customer-centric mindset.
- Understand what SAFe is, what business agility is, and how SAFe supports it.
- Learn how an organization can get started with the Scaled Agile Framework.
